ContentSquare plays a huge role in helping Clarks improve our checkout journey, reduce abandonment, and increase on-site conversions. Like most ecommerce teams, a key challenge for us is knowing where to focus and prioritize, and with the Monetate integration, we're able to see and take action on this faster.

1 Intuitive Data Visualization

Use [Journey Analysis](#) after a test to see how each variant explored your site, represented in a simple sunburst graphic.

2 Complete Behavior Capture

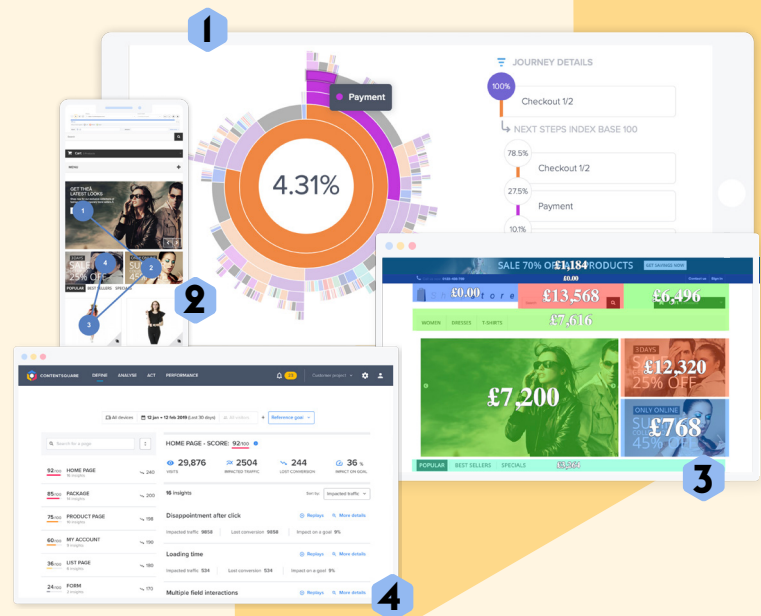

[Session Replay](#) lets you recreate individual sessions to reveal what caused specific behaviors.

3 Deeper Variant Analysis

[Zone-Based Heatmaps](#) reveal *why* a test won or lost. Compare user behaviour on each variant side-by-side and understand how visitors interact with every in-page element using unique engagement, conversion and revenue metrics.

4 Better results, with less effort

[Insights](#) constantly monitors your site to reveal previously unseen test opportunities.

Testing and Optimization

Experiment with content and design using A/B/n, multivariate, and AI-driven dynamic testing. Visualize the influence of experiments to discover new opportunities with Contentsquare.

Segmentation and targeting

Identify and target users to tailor the customer experience for each segment. Instantly quantify the impact of your segments or individual users in Contentsquare.

1-to-1 Personalisation

Serve the best content for each visitor based on context and behavior, assessed in real-time.

Adaptive Recommendations

Deliver manually-curated, algorithmically-based, or AI-driven product recommendations.

Customer Data Management

Identify customers across devices to create consistent experiences.
